AMCOIL-1

Detailed Information on Medical Colleagues of AMCOIL-1 in Cuba

Action: FBI

1. In late December 1966 and early January 1967 GUEHR-1 debriefed AMCOIL-1 in detail regarding his medical colleagues still in Cuba. AMCOIL-1 said that most of them would like to leave Cuba. The majority of those described below are psychiatrists who are keenly aware of, and depressed by, the effect of the Castro regime. Almost all of the psychiatrists mentioned herein have friends and patients among Cuban Government officials and, in AMCOIL-1's opinion, those defecting would cooperate in extensive debriefings of their considerable knowledge.
- Most of them frequently travel abroad. AMCOIL-1 is attempting to maintain correspondence with the most prominent. The [redacted] of any of the psychiatrists would be especially harmful to the present Cuban Government, since it is faced with a rapid increase of suicides, mental illnesses, and alcoholism, stemming from a general breakdown of morals and mental health as traditional values are uprooted and replaced by repressive, unfamiliar demands.

2. In the descriptions that follow, it should be noted that the Department of Psychiatry of the University of Havana Medical School is composed of professors and instructors from the psychiatric staffs of several hospitals, where the classes actually are given; there is no University Hospital per se.

CIA: CIC: Q 3. Cuban Physicians Considered as Possible Prospects for [redacted]

- ✓ [redacted] Assistant Director of the Department of Psychiatry of the [redacted] wife, and mother criticize the regime. Fully professor. [redacted] wife, and mother criticize the regime. Has son 13 years of age. Attends correspondence with a brother [redacted] in the U.S. Takes a courageous stand against the regime but [redacted] valuably indiscreet. In August 1966 said that he probably was going to be the father of an illegitimate child. Age 40, 5' 5", 160 pounds, almost totally bald. Would [redacted] cooperate in being debriefed if abroad with family.

Dec 6, 1928	Assistant Professor of Psychiatry at the [redacted] Hospital. Intelligent and professionally qualified. Admitted he is a candidate for the Cuban Communist Party in order to live more comfortably. Married to a former medical school student who desires to leave Cuba and who constantly criticizes the political indoctrination in Cuban schools suffered by their four children. [redacted] admits corresponding with a brother in Miami. Age 35-40, 5' 7", 170 pounds, black hair. Would probably defect and be debriefed if abroad with family.	
Dec 6, 1928	J. C. JOYODU Prevez, René. Assistant Professor [redacted] at the [redacted] Hospital. Follows the dictates of the regime with commentary. Is sole member of [redacted] staff to side with the staff of the Department of Medical Psychology of the University of Havana, headed by Jesse Angel Bustamante, which is notoriously servile to the regime. Attended the 1960 international psychiatric congress in Madrid. Married and regularly fights in public with his wife. Milatito, Age 35-40, 5' 11", 170 pounds, black hair. Major possibility of [redacted] if [redacted] felt there was absolutely no risk involved.	
Se: F Dec 6, 1940	Specially appointed Professor of Psychology of the [redacted] Hospital. Only intimate friends know that she is firmly anti-regime, as she pretends the opposite, in order to support her widowed mother and younger brother Philip, currently majoring in English Literature at the University of Havana and attempting to obtain a scholarship for study abroad (probably England). [redacted] may have been born in the U.S., when her father was a Cuban diplomat posted there. She would leave Cuba if it were not for family commitments. She is a courageous, discreet woman, about 26 years old, who might possibly work against the regime while still in Cuba, and most probably would do so if she and her family were outside of Cuba. Would seek a scholarship to study abroad if there were a way to make up for the loss of her monthly income of approximately 500 pesos, which is needed for the support of her family.	
Dec 6, 1939	F. [redacted] (fmu). Instructor of Psychiatry, University of [redacted] Hospital. Admits he desires to leave Cuba but is too gripped by inertia or fear to try. His wife also wishes to leave. They have one or two children. Age 26-27, 5' 6", 130 pounds, blond hair. If abroad with family he would probably [redacted]. He is too timid for any other operational utilization.	
Dec 6, 1928	[redacted] Hospital. Admitted being so emotionally distressed by his inability to leave Cuba that he requested not to teach university classes. He is attempting to leave through a scholarship, as a delegate to a medical congress, or through the translation/publication of <u>Intelligence and Experience</u> , a medical text by U.S. author James Inci. But, with whom he [redacted]. He is married and has a 15-year-old son, whom he is resigned to leave behind to perform obligatory military services, in the event he and his wife can leave. 5. Cuban Physicians Whose Defection is Considered Virtually Impossible

DeB.C.151

A. Rodriguez, Luis. Professor and Director of the University of Havana Medical School, he has been a member of the Communist Party in Cuba since a youth. He is intelligent, perceptive, and dedicated to his career. He is married and has three or four children. Age 36, 5' 7", 180 pounds, black hair.

DeB.C.152

B. F. GIRONZATEGUI Dupuy, Fidel. Assistant Professor of the University of Havana Medical School. Member of the Cuban Communist Party. He is quite satisfied with the present situation - is well off financially, has prestige, and travels regularly. He was a delegate to the medical congress in India in 1966. He is married to Noemi Valdes, a professor of the School of Psychology, University of Havana. Age 35-40, 5' 6", 150 pounds, mulatto.

DeB:152

C. CHAVES Carrionos, Jose. Rector of the University of Havana since August 1966. He made a rapid rise from Director of Rural Medicine to Minister of Public Health. He is credited with professional skill as an administrator and public relations type and is said to be a traveling companion of Fidel Castro. He is not believed to be a member of the Communist Party of Cuba. He is married [redacted] Age 34, 5' 8", 170 pounds, black hair.

F. MODESTO (fm). Instructor of Psychiatry at the University of Havana Medical School/Calixto Garcia Hospital. A Brazilian citizen resident in Cuba since 1961, Modesto is a fanatically anti-American Marxist who broadcasts to Brazil for Radio Havana. He swears he will participate in the violent overthrow of the Brazilian Government, once he returns from Cuba in 1967 via Mexico. He is married to a Cuban whose wealthy father lives in Mexico but travels frequently to Cuba. Age 30-35, 6', 200 pounds, black hair, mulatto. In AMULL-1's opinion, Modesto is a dangerous political fanatic, about whom the Brazilian authorities should be warned.

DeB:C.155

G. CALIGARIA, Jose. Director of the Department of Psychiatry of the University of Havana/Calixto Garcia Hospital. Full professor. Attempts to ignore the realities of Cuban life but has been emotionally depressed by them. Age 58-60. Will stay in Cuba where he is assured of material comfort in return for being integrated with the regime.

CURRENT DEVELOPMENT IN MEDICINE

[The following is a translation of the titles, authors and summaries of several articles which appeared in the Revista Cubana de Medicina, Vol. IV, No. 2, Havana, 30 April 1965. The pages are indicated before each title.]

129 SOCIAL PSYCHOLOGY: A STUDY ON ITS LIMITS
 AND BASIC CONCEPTS^(*)

By Dr. Leopoldo E. Araujo Bernal^(*)

(*) Professor of Medical Psychology, School of Medical Services of the University of Havana. Director of the Department of Social Psychology of the Institute of Advanced Nervous Activity.

137 ELECTROCARDIOGRAPHICAL ALTERATIONS IN THE
 TRANSVENTRICULAR MITRAL COMMISSURONY

By Dr. A. Hernandez Canero^(*), Dr. M. Almeida Mon^(**)
and Dr. J. Castillo Navarro^(**)

(*) Professor of Internal Medicine, Head of the Cardiology Department of the Comandante Manuel Fajardo Training Hospital.

(**) Assistant Specialists, Department of Cardiology of the Comandante Manuel Fajardo Training Hospital.

142 CONCLUSIONS

1. The electrocardiograms corresponding to 33 cases of mitral stenosis operated transventricularly were studied.

2. The rhythm variations, as well as the favorable changes in the auricular and ventricular complex are those which, according to other authors, are present in patients operated transauricularly.

JPMG Sub No 33413 : Date 20 DEC 65
Trans. cc Card No. 341 : UCB

3. Many instances of pericardic injury were observed immediately after the operation. This injury is similar to that observed in patients mentioned throughout the article.

4. We were able to observe a fast deviation of the QRS axis towards the left, accompanied by signs of left ventricular hypertrophy, which shows severe mitral insufficiency.

5. The possibility of myocardial infarction following the transventricular mitral dilatation is mentioned.

165

CHRONIC OBSTRUCTIVE EMPHYSEMA (*)
PSYCHOPATHOLOGY

By Dr. Alberto Orlandini N. (**)

(*) Presented before the First Regional Congress on Stomatology of Southern Oriente, on 29 October 1964.

(**) Resident of the Psychiatric Service, Provincial Training Hospital of Santiago de Cuba.

167

SUMMARY

The chronic obstructive emphysema with breathing insufficiency of the fourth degree originates first delirium, and then catatonic stupor. The psychic disturbances following the changes of consciousness are described.

168

CARDIOVASCULAR ASPECTS OF SICKLECELLIA (*)

By Dr. Jose Cabrera Flores(**) and
Dr. Hugo Camargo Gallegos(**)

(*) Presented before the First Regional Congress on Stomatology of Southern Oriente. Santiago de Cuba, October 1964.

(**) Dr. Enrique Cabrera Cosio Cardiovascular Department. Provincial Hospital of Santiago de Cuba.

169

CONCLUSIONS

After studying eight patients with Sicklecellia, the most important observation has been the enlargement of the electric systole shown by the electrocardiograms. This is to be confirmed in subsequent studies. Other observations are the presence of the Moglobin syndrome in the two cases presenting the lowest hemoglobin level, the evolution with normal cardiac rhythm in most cases. This phenomenon is present in the evolution of chronic anemic syndromes and has not been fully explained yet.
